Human Resource Manger

MTN

Ghana West Africa Accra

Dear Sir/Madam,

At present, I'm an Network Engineer/IT technician consultant for Nopak Construction and Unibrouz Education Consulting Agency, and I manage all levels of hardware, software, and network issues. I saw a vacancy opening for a new IT technician at your company and I immediately pictured myself there.

My 2yrs of experience focused mostly on issues with computer maintenance, software upgrades, network troubleshoot and configuration and remote customer support. I also ensured the managers and executives in the office maintained hardware performance and network connectivity and good security practice.

I bring dedication and effectiveness to my job and I am analytical in task execution. I'd be quite eager to bring this same pride-of-work ethics over to your company as you require.

If you would provide me the chance, I'd love to discuss further how I can best meet your company's upcoming goals and information technology initiatives.

Sincerely,
Emmanuel Koranteng

P.S.—I am available for interview or any further discussions. Please reach me either by phone or email, details provided above. Thank you.
